

Adrian Towse

Director Emeritus and Senior Research Fellow

ATOWSE@OHE.ORG

ABOUT

Adrian's current research includes incentives for new drugs and vaccines to tackle Antimicrobial Resistance, the use of 'risk-sharing' arrangements between health care payers and pharmaceutical companies, elements of value and use of value-based pricing; the economics of stratified medicine for health care payers and the pharmaceutical industry; and economic issues that affect both R&D for and access to treatments for diseases prevalent in the low and middle income countries.

EXPERTISE

Value based pricing approaches

Incentivising new drugs/ vaccines to tackle AMR

Incentives for R&D to tackle global health challenges

The economics of stratified / precision medicine

Risk- sharing arrangements between payers and pharmaceutical companies

Economics of the pharmaceutical industry
